

To The FCC,

I am writing to strongly urge against allowing BPL. As an FCC licensed Extra class Amateur for over 25 years, I believe BPL will cause high levels of interference to many radio services. There are many important radio services operating in the spectrum that would be affected, and some of them are critical to safety and our national security. It is important that this spectrum be kept usable.

Thanks for your consideration and please do not permit BPL.

Regards,

Mark R. Gilbert - Amateur License holder N1MG
